

Tae Ha "Jeff" Park

GN&C ENGINEER, NARA SPACE TECHNOLOGY

Seoul, Republic of KOREA

✉ thpark@naraspace.com | 🏠 taehajeffpark.com | 📱 tpark94 | 🌐 taehajeffpark | 🏠 Tae Ha Park

Education

Stanford University

Ph.D. in Aeronautics & Astronautics | Advisor: Dr. Simone D'Amico

Stanford, CA
04/2018 – 06/2024

- Thesis: Robust Machine Learning for Vision-Based Navigation about Non-Cooperative Resident Space Objects
- Teaching Assistant for AA279A: Space Mechanics (2019, 2021, 2022).

Stanford University

M.S. in Aeronautics & Astronautics

Stanford, CA
09/2017 – 04/2020

- Conducted research on deep learning, computer vision, spacecraft swarm navigation and optimization

Harvey Mudd College (HMC)

B.S. in Engineering

Claremont, CA
08/2013 – 05/2017

- Graduated with High Distinction (GPA: 3.81/4.0)
- Member of the Tau Beta Pi Engineering Honors Society
- De Pietro fellow in Civil Engineering

Experience

Nara Space Technology Inc.

Project Manager | Development of AI-Based Space Traffic Management Technology using
Microsatellites

Seoul, Korea
12/2024 – Current

- PM of a 3-year R&D project (₩1,200,000,000) awarded by the Ministry of SMEs and Startups of the South Korean government on the topic of AI-empowered vision-based rendezvous and proximity operations with unknown non-cooperative spaceborne targets

Research Engineer | Guidance, Navigation and Control (GN&C) Team I

07/2024 – Current

- Developing an in-house CubeSat AOCS system and its software & hardware validation environments
- Developing an intelligent system for autonomous vision-based navigation about arbitrary resident space objects

Infinite Orbits SAS

Computer Vision and GN&C Intern

Toulouse, France
06/2022 – 08/2022

- Constructed a satellite rendezvous simulator and scene renderer based on Unreal Engine 5 and C++ to train and validate convolutional neural networks for monocular pose estimation and tracking of known noncooperative spacecraft

Space Rendezvous Laboratory (SLAB)

Research Assistant | Advisor: Dr. Simone D'Amico

Stanford, CA
01/2019 – 06/2024

- Developed the Testbed for Rendezvous and Optical Navigation (TRON) facility that can simulate various Rendezvous and Proximity Operation (RPO) scenarios using a mockup satellite model under high-fidelity spaceborne illumination settings [C3]
- Developed advanced open-source benchmark datasets (e.g., SPEED+, SHIRT, SPE3R) using synthetic renders—OpenGL/Unreal Engine—and TRON to train and validate spaceborne vision-based Deep Learning (DL) and navigation algorithms with emphasis on robustness across domain gap between synthetic and spaceborne data [C1, C4, C6, C8, C9, D2–D5, J2, J3, J5]
- Developed and integrated robust DL models and navigation algorithms for vision-based RPO with noncooperative target [C5–C7, C10, J4–J6]
- Developed a DL model for single-shot 3D reconstruction and pose estimation of an unknown spacecraft from 2D images [C8]

Honors & Awards

2025	2024 Outstanding Paper Award for Young Scientists , <i>Committee on Space Research (COSPAR)</i>	-
2024	2020 M. Barry Carlton Award , <i>IEEE Aerospace and Electronics System Society</i>	-
2019	Best Paper Award , <i>2019 AAS/AIAA Astrodynamics Specialist Conference</i>	Portland, ME
2015	Tau Beta Pi Engineering Honors Society , <i>HMC</i>	Claremont, CA
2015	De Pietro Fellowship in Civil Engineering , <i>HMC</i>	Claremont, CA
2013	Harvey S. Mudd Merits , <i>HMC</i>	Claremont, CA
2013-17	Dean's List , <i>HMC</i>	Claremont, CA
